

RESEARCH ASSIGNMENT

Instagram donation campaign

Assess how an Instagram video or image can lead supporters directly to a focused donation page, bypassing general website navigation. Recommend a practical, affordable route to more completed donations and greater awareness.

ASSIGNED TO

Micheal

PRIORITY AUDIENCE

Pennsylvania / United States

SCOPE

Research and recommendation only

DELIVERY DATE

Agree with the project lead

Proposed journey → Instagram ad → Donation page → Secure payment → Confirmation

01 Confirm the available routes

- Compare **paid Instagram ads linking to a donation page**, organic link options, and native Instagram/Meta fundraising tools where available.
- Verify clickable links and call-to-action buttons for Feed, Reels and Stories; distinguish paid ads from ordinary posts.
- Confirm current country availability, nonprofit eligibility, verification documents, fees, payout timing and access to donor records.
- Assess whether the existing [/donate page](#) can serve the campaign or a shorter page is needed. Use the existing Stripe setup as the starting point.

02 Map the setup and workload

- List required Instagram/Facebook accounts, Meta Business Portfolio, ad account, permissions, billing access and verification steps.
- Estimate setup hours, lead times and weekly work for content, ad management, donor support and technical maintenance.
- Identify launch blockers: ad approval, payment confirmation, receipts, email delivery, mobile usability and page capacity.

03 Define the page and creative

- Provide one simple mobile wireframe: campaign purpose, impact, trust information, donation amount/action and confirmation route.
- Outline **two short video concepts and one image concept**, each with a message, donation call-to-action and required assets.
- Identify image/student consent, donor privacy, receipt disclosures and any relevant Meta advertising restrictions.

REQUIRED OUTPUTS

Costs and recommendation

04 Build a realistic budget

- Compare **14-day pilots with US\$100, US\$300 and US\$1,000 ad spend**. These are research scenarios, not approved spending.
- Separate one-off and ongoing costs: advertising, creative, landing page, hosting, payment/platform fees and support. Note currency, tax and payout deductions where applicable.
- Show low/base/high estimates for clicks, completed donors, average gift, cost per donor and net funds raised. State conversion assumptions and break-even conditions.
- Use current, account-country-specific prices and cited benchmarks. Label estimates clearly; do not present fundraising returns as guaranteed.

05 Explain measurement and a small pilot

- Propose Pennsylvania audience targeting, placements, a 14-day schedule and two creative variants to compare.
- Define reach, link clicks, confirmed donations, conversion rate, cost per donor and net funds raised; separate awareness from fundraising results.
- Explain campaign-link tracking and payment attribution. Assess Meta Pixel/Conversions API needs, consent and donor-data protection; avoid counting clicks or abandoned checkouts as donations.
- Recommend spending caps, review checkpoints and rules for stopping, adjusting or expanding a pilot.

06 Submit a decision-ready research pack

- **Findings brief — maximum 3 pages**: recommended route, alternatives, rationale, risks and unresolved questions.
- **Budget table**: three spend scenarios, itemized costs, assumptions and forecast ranges.
- **One mobile wireframe** plus the three creative outlines; include a checklist of prerequisites, roles and estimated hours.
- **Evidence**: current official source links and date checked; two comparable nonprofit campaign examples, noting what is publicly verifiable.

Research standard

Verify current platform availability in the relevant accounts and markets. Flag any requirement needing leadership, finance or legal input. Submit a clear **proceed / revise / do not proceed** recommendation and the minimum viable pilot budget.

Research only

Do not publish ads, commit spending, change the live website or process test donations. Request account access through approved roles; never include passwords, keys or donor personal data in the report.
